Atlas Engineered Products Ltd.
Notes to the Condensed Interim Consolidated Financial Statements
For the three and six months ended November 30, 2017 and 2016
(Unaudited - expressed in Canadian dollars)

1. Nature of operations and going concern

Atlas Engineered Products Ltd. (the “Company” or “Atlas”) was incorporated pursuant to the provisions of the Business Corporations Act (British Columbia) on January 18, 1999. The company’s principal activities involve manufacturing trusses for commercial and residential buildings and delivering to their customers on Vancouver Island and the Lower Mainland.

These condensed interim consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to meet its obligations and continue its operations for the next twelve months.

The Company’s corporate office is located at 2005 Boxwood Road, Nanaimo, British Columbia V9S 5X9.

On July 31, 2017, the Company amalgamated with its affiliated company, Coastal Windows Ltd. (“Coastal”) and has continued operating in the normal course of business following the amalgamation under the name Atlas Engineered Products Ltd.

On November 6, 2017, the Company completed the transaction with Archer Petroleum Corp. (“Archer”) whereby Archer has agreed to acquire all of the issued and outstanding shares of Atlas through a reverse takeover transaction (the “RTO” or the “Transaction”). On completion of the Transaction, the shareholders of Atlas obtained control of the consolidated entity. Under the purchase method of accounting, Atlas has been identified as the acquirer, and accordingly the entity is considered to be a continuation of the Company with the net assets of Archer as at the date of the RTO deemed to be acquired by Atlas. The consolidated financial statements for the six months ended November 30, 2017 include the results of operations of Atlas from June 1, 2017 and of the Company from November 6, the date of the RTO. The comparative figures are those of Atlas. Refer to Note 4 for details of the Transaction.

2. Basis of preparation

Statement of compliance and functional currency

These condensed interim consolidated financial statements have been presented in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”), effective for the Company’s reporting for the period ended May 31, 2017.

These condensed interim consolidated financial statements have been prepared on a historical cost basis and are presented in Canadian dollars, which is the functional currency of the Company and its subsidiaries.

The accounts of the subsidiary are prepared for the same reporting period as the parent company, using consistent accounting policies. Inter-company transactions, balances and unrealized gains or losses on transactions are eliminated.

These condensed interim consolidated financial statements were approved for issue by the Board of Directors on January 24, 2018.

3. Accounting policies

Initial adoption of accounting policies

These condensed interim consolidated financial statements have been prepared on a basis consistent with the significant accounting policies disclosed in the annual financial statements for the year ended May 31, 2017, except for the following policies adopted in the current financial period:

a) Exchangeable notes

Exchangeable notes are separated into their liability and equity components on the statement of financial position. The liability component is initially recognized at fair value, calculated as the net present value of a similar liability without an associated equity conversion feature and accounted for at amortized cost using the effective interest rate method. The effective interest rate used is the estimated rate for debt with similar terms at the time of issue. The fair value of the equity component (conversion feature) is determined at the time of issue as the difference between the face value of the exchangeable note and the fair value of the liability component

b) Business Combinations

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. The consideration of each business combination is measured, at the date of the exchange, as the aggregate of the fair value of assets given, liabilities incurred or assumed, and equity instruments issued by the Company in exchange for control of the acquiree. Under the guidance of IFRS 10 Consolidated Financial Statements, control is established by having power over the acquiree, exposure or rights to variable returns from its involvement with the acquiree, and the ability to use its power over the acquiree to affect the amount of the acquirer's returns. The acquiree's identifiable assets, liabilities and contingent liabilities are recognized at their fair value at the acquisition date. During the six months ended November 30, 2017, the Company's reverse takeover transaction with Archer and the amalgamation with Coastal were recorded as asset acquisitions.

c) Share-based Payments

Common shares issued for non-monetary consideration are recorded at the fair value of the goods or services received. When the value of goods or services received in exchange for share-based payments cannot be reliably estimated, the value is measured by reference to the trading price of the Company's shares on the TSX Venture Exchange ("the TSX-V") on the date of the agreement to issue the shares. If market prices are not available, fair value is measured by use of a valuation model.

The Company has a stock option plan, whereby stock options are granted in accordance with the policies of regulatory authorities. The Company records a compensation cost attributable to all share purchase options granted at fair value at the grant date using the Black-Scholes valuation model and the fair value of all share purchase options are expensed over their vesting period with a corresponding increase to contributed surplus. Upon exercise of share purchase options, the consideration paid by the option holder, together with the amount previously recognized in contributed surplus, is recorded as an increase to share capital.

Accounting standards issued but not yet effective

The following new standard has been issued but not yet applied. The Company is currently evaluating the impact of this standard on its financial statements.

a) IFRS 9 – Financial Instruments

In July 2014, the IASB issued the final version of IFRS 9, *Financial Instruments* ("IFRS 9") bringing together the classification and measurement, impairment and hedge accounting phases of the IASB's project to replace IAS 39, *Financial Instruments: Recognition and Measurement*. IFRS 9 retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets: amortized cost and fair value. IFRS 9 also amends some of the requirements of IFRS 7 *Financial Instruments: Disclosures*, including added disclosures about investments in equity instruments measured at fair value in other comprehensive income, and guidance on financial liabilities and the de-recognition of financial instruments. The mandatory effective date of IFRS 9 will be annual periods beginning on or after January 1, 2018, with early adoption permitted.

4. Reverse takeover transaction

On November 6, 2017, the Company completed a transaction with Archer Petroleum Corp. (“Archer”) whereby Archer had agreed to acquire all of the issued and outstanding shares of Atlas (the “Transaction”). Under the terms of the Transaction, Archer paid the principal shareholders \$1,000,000 and issued shares to the shareholders of Atlas on a 1:1 basis. On completion of the Transaction, the shareholders of Atlas obtained control of the consolidated entity. Under the purchase method of accounting, Atlas has been identified as the acquirer, and accordingly the entity is considered to be a continuation of the Company with the net assets of Archer acquired as at the date of the Transaction.

On completion of the Transaction, Atlas was renamed 1128469 BC Ltd. and Archer was renamed Atlas Engineered Products Ltd.

In accordance with IFRS 3, the substance of the transaction was a reverse takeover (“RTO”) of a non-operating company. The transaction does not constitute a business combination since Archer does not meet the definition of a business under IFRS 3. As a result, the transaction is accounted for as an asset acquisition with Atlas being identified as the acquirer (legal subsidiary) and Archer being treated as the accounting subsidiary (legal parent) with the transaction being measured at the fair value of the equity consideration issued to Archer.

The net assets acquired was the fair value of the net assets of Archer, which on November 6, 2017 was (\$181,150). The amount was calculated as follows:

Category	\$
Fair value of 11,709,091 common shares of the Company at \$0.40 per share	4,683,636
Cash	1,000,000
Total consideration	5,683,636

5. Amalgamation with Coastal Windows Ltd.

On July 31, 2017, the Company amalgamated with its affiliated company, Coastal Windows Ltd. ("Coastal") and has continued operating in the normal course of business following the amalgamation under the name Atlas Engineered Products Ltd.

For accounting purposes, Coastal was acquired and this was recorded as an asset acquisition. At the time of the transaction, both Atlas and Coastal were under common control, and therefore the accounting is applied as a continuity of interests.

Consideration paid:

	\$
Fair value of 200 common shares issued	20

The fair value of identifiable assets acquired and liabilities assumed from Coastal were as follows:

	\$
Deferred income tax asset	744,631
Due to Atlas Engineered Products Ltd.	(744,611)
Total identifiable assets acquired	20

Upon acquisition, there was an amalgamation of Atlas and Coastal. As a result of the amalgamation of Atlas and Coastal, tax losses carried forward of \$2,863,888 originating in Coastal will be available for use by Atlas to offset its future taxable income. The due from Coastal account at May 31, 2017, previously limited to the tax effect of the tax losses carried forward of \$744,611, was eliminated, and the tax effect of the loss carry forward increased the deferred tax asset.
